"My freshman year here at UF has been great so far! I am currently finishing up my prerequisites for electrical engineering and will begin my field specific classes next fall! I am very thankful for the SAME scholarship and its ability to assist me in my education at the University of Florida! Thank you for your time and contribution towards my future and others!"

Ryan Schrope
Electrical Engineering
University of Florida

SAME traces its history from the 11,000 civilian engineers called to duty as the United States entered World War I, and today the Society carries on the mission to advance engineering for our nation's security. A core focus of SAME is to promote and facilitate engineering support for national security by developing and enhancing relationships and competencies among uniformed services, public- and private-sector Engineers and related professionals, and by developing future engineers through education, outreach, and mentoring. Throughout Brevard County, SAME's mission is carried out by the Space Coast Post. The Post makes a positive impact by mentoring uniformed men and women to support their growth and by connecting them with private-sector engineers and professionals. The local Post mentors our youth through involvement at local schools and financial support of Eagle Scout projects, JROTC programs, and college-bound students pursuing a career in engineering, architecture, or construction. These activities, along with other volunteer outreaches, help realize SAME's aspirations to elevate the American community along with our nation's armed forces.
